

Top Message

Thank you very much for your continued support.

We, IMAGICA GROUP, celebrated our 90th anniversary on February 18, 2025. We would like to express our sincere gratitude to all of you for your support and patronage that have enabled us to reach this milestone.

Founded in 1935 in Uzumasa, Kyoto, we began our business as a film development and printing firm for showing. Since then, we have proactively adapted and expanded our business domain to meet market demand while anticipating the rapid evolution of imaging technology. Today, we provide a comprehensive range of services and products to global markets, from entertainment to industrial fields, with "imaging" at the core.

The trust and achievements we have built over the years in imaging-related fields are our irreplaceable assets, and we intend to continue to develop them into the future. Additionally, in order to be a group that continues to provide new value to society, we will not be bound by our existing business areas but will actively take on the challenges of new markets, new technologies, and new business models and seek opportunities for growth.

The IMAGICA GROUP will continue to challenge itself to be "a visual communications group that strives to create new value with a sincere spirit and provides the world with surprise and excitement," as stated in our Group Mission. We kindly ask for your continued support.

IMAGICA IRIS Corp.

A digital advertising agency specializing in creative

IMAGICA IRIS acts as an interface between clients and their users by connecting the respective "want to tell" and the "want to know" needs. We follow through the digital advertisement workflow from planning, production, to operational analysis by applying the expertise of video production built by the IMAGICA GROUP.

Advertising Operations

We provide a comprehensive service from optimal advertising design tailored to product and objectives, through media selection, distribution, and analytic reporting, supporting clients in achieving their KPIs. Our advertising operations team, along with creators and planners across the organization, collaborates to swiftly iterate through the PDCA cycle to maximize effectiveness.

Creative production

·Video Production

Using creative tailored to objectives and media, we produce targeted video ads that resonate with audiences. We handle a wide range of expressions including live-action shoots, animations, and still image assets. Post-distribution, we analyze and refine the creative to continually enhance effectiveness.

Web Content Production

To maximize digital advertising effectiveness, we produce LPs and banners covering all pathways to conversion. We also offer capabilities in TV commercials and promotional videos (VP, PV, etc.), ensuring comprehensive support for client goals.

OLM, Inc. / OLM Digital, Inc. Come Smile With Us

All smiles are equally and universally beautiful, no matter a person's age, gender, or culture. And it's an absolute delight to see audiences smile when they watch wonderful films. For OLM Group, it's that chance of seeing those smiles on our audiences' faces which keeps us motivated. OLM Group made our debut with "Pokémon", a franchise which continues to be cherished globally, and is now a leading 2D Animation, CG Animation and VFX studio. In addition, we have also been expanding our horizons by producing films and series for international audiences. We love when our audiences feel enriched by the content that we poured our heart and soul into. We want to reach out everywhere, to as many people as we can, and create work that resonates with them. OLM Group brings wonderful smiles and heartwarming stories to people around the world.

Animation Production

Each project has a dedicated team which works together to facilitate a smooth production process. Our work is brought to life through the direction and animation of our creators, whose refined sensibilities were cultivated through years of experience. The footage is then enhanced through colorization and editing in our robust digital environments for a high-quality finish.

Live-Action Films and Series

CG is OLM Group's forte, and by integrating CG into live action, we can add layers of realism to our work and push the boundaries of modern entertainment. In addition, we have expanded our involvement from not only producing feature films, but also to producing television series, web series, and other mediums to diversify our capabilities.

3DCG Animation Production

We handle digital video production from start to finish. This entails everything from the pre-production stage of planning and scripting, the production of 3DCG and visual effects for animation / live-action, to compositing and editing. Our high-quality videos are effectively created with top class Japanese system environments and proprietary tools.

Sprite Entertainment, Inc. (Sprite Animation Studios) Where excitement is limitless!

At Sprite Animation Studios we specialize in creating CG animated projects. Our passion to create something that is uniquely ours – infused with a touch of "Spriteness" – gave birth to Sprite Animation Studios in 2002 in Honolulu, Hawaii. In 2004, Sprite Animation Studios relocated to Los Angeles, which has been our home ever since. Although our company is American-born and bred, our core staff is comprised of creative minds with cultural roots in both Japan and America. The collaboration of these "East Meets West" values allows us to create unique works which we delight in sharing with the world. As a small boutique studio in LA we swim in a big pond but our great passion and pride allows us to achieve the impossible. We believe that a good CG-animated story has the magical power to touch and transport its audience to a different time and place, and we will always be passionate about crafting this magic for our audience!

CG Production

Being based in Los Angeles and creating original content for global audiences, Sprite gets the latest news on worldwide industry trends and insight, and we are a part of a vast network of fantastic artists from all over the world. We' ve created our own unique workflow tools that cover all the steps from planning to video production. The work we create in this energetic and inspiring environment are inimitable and have unique significance throughout the world.

IMAGICA

Imagica Infos Co., Ltd.

A story, a word, a voice, a character, or a single photo can create a world of entertainment

Imagica Infos is a comprehensive entertainment company that develops content across a wide range of media. We operate the light novel label Hero Bunko (available in both print and digital formats), featuring titles such as The Apothecary Diaries—a major hit with over 40 million copies sold and widespread popularity through its anime adaptation. Our Seiyu Grand Prix brand offers comprehensive voice actor coverage across magazines, websites, photo books, video streaming, and events. For lottery enthusiasts, we provide Loto, Numbers "cho" Tekichuho via print publications and Al-powered services. We also produce and distribute S Cawaii! for young female audiences through magazines, online content, and photo books that showcase the latest trends. In addition, we produce light anime—a new style of animation that leverages manga and webtoons as source material. By leveraging these core content brands, we maximize the value of our IPs through anime adaptations, game development, and merchandising, expanding both domestically and internationally as an IP agent.

Cinema Connect, Inc.

Connecting advanced technologies with cinemas

CINEMACONNECT

Imagica Entertainment Media Services, Inc. has pioneered digital cinema services by mastering and delivering Digital Cinema Packages (DCPs) of numerous movies for showing in theaters, creating Key Delivery Messages (KDMs), and supporting distributors and exhibitors since 2000. Envisioning the advancement of video and network technologies, we have stayed one step ahead and built a track record in the delivery service to theaters.

From April 1, 2023, Cinema Connect, Inc. has started offering the service to deliver DCPs and KDMs, operationally support cinema advertisements, and install and maintain the system for content delivery to movie theaters.

SERVICES

DCP and KDM Delivery

Operational support for cinema advertising

Installation and maintenance of delivery system for theaters

DCP and KDM Delivery

We annually deliver more than 300 titles to movie theaters in Japan and the world with excellence at our facility, which has the nation's highest capacity. Our proprietary management system enables secure and precise delivery of DCPs and KDMs, supporting the showing of the movies to audiences.

Shaula—DCP delivery and management system

Shaula enables efficient and precise delivery of DCP data to a server connected to a Theater Management System (TMS) via a secure nationwide VPN built by our group.

CLAVIS—KDM generating and managing system

CLAVIS is a system that supports the playback of movies in theaters. It efficiently generates and manages the delivery of KDMs. Information about the playback device at every theater in Japan is stored in CLAVIS, and the data is constantly updated, enabling precise KDM generation.

Movie Theater Support

Troubleshooting of playback devices and KDM re-generation are among the operational support for movie theaters.

Operational support for cinema advertising

We provide organization and management support for cinema advertising for theatrical showings, as well as a delivery service for cinema advertising DCP using "Shaula," for entertainment industry companies.

Installation and maintenance of delivery system for theaters

We provide installation and maintenance services for the DCP electrical delivery and management system "Shaula" for entertainment industry companies. Shaula meets the system requirements of network distribution — including certainty, safety, reliability, and efficiency — and has been installed at many theaters.

Integrated Localization and Distribution Services as an E2E Offering

Pixelogic has been internally developing and utilizing a proprietary next-gen platform called pHelix, which is an end-to-end (E2E) servicing platform. This integrated platform enables seamless delivery of localization, distribution and Creative services, allowing major Hollywood studios, broadcasters and digital platforms (OTT/streaming services) to deliver their valuable content globally within compressed distribution windows. The demand for E2E Services has been increasing year after year as the market for content continues to migrate toward a global day and date release strategy.

IMAGICA Lab. Inc.

To bring 'wonder and emotion' through visuals, we deliver professional creative services.

As Japan's largest commercial post-production company, IMAGICA Lab. has continuously contributed to the evolution of visual expression as a professional in video production. Building on our expertise in film development, video editing, and the latest digital technologies, we provide one-stop visual technology services – from finishing to delivery – for commercials, music videos, and other productions, driven by a commitment to technical prowess and elevated visual expression.

Post-production services

With our extensive knowledge and proven techniques, we offer one-stop video production support from filming to finishing, transforming your creative ideas into powerful visual expressions.

- Shooting
- Offline Editing
- CG/VFX/In-camera VFX
- Color grading
- Online Editing
- Synchronized recording/Multi audio

Production Services

Combining high-end video production expertise with cutting-edge technology, we create visuals filled with wonder and emotion.

- Planning and Production
- Motion Graphics
- Al Video Production
- AR/VR production
- OOH production

Delivery and data management services

We also provide high-quality delivery processes for the broadcast and distribution of commercials, as well as data management services essential to video production.

- TV commercials material delivery
 Online draft delivery / OA prints /
 Creating subtitled TV commercials
- HDD/SSD rentals
- LTO Backup Services
- Migration
- High-capacity data transfer

IMAGICA cosmo@space

IMAGICA COSMO SPACE Inc.

Integrating 'technology' and 'production', we stand as IMAGICA GROUP's only full-service video production company.

As a professional collective thriving on the fusion of creativity and technology in visual production, we are committed to pursuing our dreams and consistently delivering wonder and inspiration to audiences through extraordinary visual experiences.

Production & Broadcast Technology

•We provide live broadcast transmissions for music concerts and sports events by leveraging state-of-the-art technology - including high-end cameras, advanced filming equipment, and broadcast vehicles—while relying on the expertise of seasoned professionals.

•We also dispatch technical staffing solutions for in-house operations at television stations, including Nippon Television Network Corporation.

Video Content Planning & Production

·We plan and produce innovative visual content that leverages our extensive creative expertise. This includes spatial exhibition videos utilizing cutting-edge technologies such as VR, immersive experiential content, on-air promotions, television programs, and more.

·Our project teams—comprising producers, directors, project managers, and CG production specialists—provide a one-stop solution, handling everything from content concept proposals to filming, editing, and final delivery.

WEATHERMAP Co., Ltd.

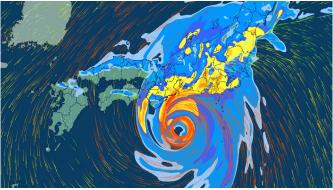

A diverse range of expertise for reliable weather information in the age of change

For WEATHERMAP the pillar of business has been "to communicate" and it has enabled us to offer various services since our establishment. We will continue to utilize the weather commentary know-how we have built over the years, to develop contents with high added value to accommodate each of the diversifying media, and to deliver weather information with a personal touch, a style that no other companies can do, by producing weathercasters who are full of personalities.

Weather Forecaster

Over 180 weather forecasters belong to our company, and they work across the country at broadcasting stations and various other media, providing commentaries about weather. They focus on communicating specialized information in a manner that is easy for the audience to follow, by applying their years of experience of working in mass media. We also plan and operate seminars and talk shows on weather and disaster prevention as well as workshops that are designed for children and their parents to have fun learning about weather.

Weather Content Solutions

We are "weather engineers." Our team of weather forecasters and engineers with expertise in weather develop weather content. We offer optimal weather solutions tailored to our customers' needs, including the use of weather information on the internet and broadcasting media, weather consulting, and more.

Education and Certificate Acquisition Support

Weather forecaster Seminar "Clear" is a course dedicated to educate and train learners to take the national certification examination for weather forecasters. We operate in-person and real-time online classes to support our learners to acquire the certification. For those who are certified, we provide practical training besides supporting them to find weather forecaster jobs.

IMAGICA GEEQ Inc.

IMAGICA GEEQ, great gaming services across the globe.

IMAGICA GEEQ was established as the gaming industry arm of the IMAGICA GROUP in April 2023. From game planning, development, 3D and 2DCG art production, localization and QA all the way to gaming industry-focused recruitment and staffing services, IMAGICA GEEQ delivers every aspect of the game production value chain to companies across the world.

SERVICES

Planning / Development

3DCG

2DCG / Illustration

Visual Outsourcing

Localization / LQA

Game Debugging / Testing

Staffing

Filming, Video Production, Video Analysis

Software Testing

[Available for All Platforms]

Be it console, mobile, arcade or PC, we have extensive experience in supporting any platform for game creation.

[Some of Japan's Largest CG Art Studios]

Looking for 3D and 2DCG artists? We have more than 400! We can handle even the largest projects.

[Pairing Localization & QA with Development]

No need to hunt down vendors for each service. We can handle localization and QA at GEEQ, too.

Photron

PHOTRON LIMITED

We value "images" as a company with original technology based on trust through customer satisfaction.

Photron is a company dedicated to image processing. We develop premium quality hardware and software, assemble an array of products that best suit our customer's workflow into cutting-edge system, make proposals with great added value, and support implementation and operation. To be "Niche but Top" (the number one company in a niche market) is our ideal, and to create trust through customer satisfaction is our basic principle. As a leading company, developing "the world's first products" is our ongoing challenge and expanding globally our pursuit.

Imaging Business

Our high-speed cameras and their related image measuring systems are developed, produced, marketed and supported here. We offer world's top-quality products.

Major product brand: FASTCAM, PhotoCam, INFINICAM, SQ CAD

Broadcast Imaging Systems Business

Photron is a system integrator of equipment and systems for TV broadcast and professional imaging applications, offering a full range of services covering design and installation of TV broadcast-related solutions. We offer a wide range of support to the broadcasting industry for their system operations.

Major manufacturers: Avid, EVS, Vizrt, ROHDE&SCHWARZ, Telestream, etc.

Drawing Solutions Business

We develop and sell drawing management systems and 2D CAD that is active in various industries such as machinery, construction, and civil engineering.

Major product brand: Zuno

Image Network Business

Photron supports your video production workflow by providing a file transfer platform that is important to video production at an affordable price, along with a tailored network for your application. We back up your video production workflow from the basis.

Major products: HARBOR, C.M.HRBOR, TASKEE

Educational Imaging System Business

We market lecture recording and distribution systems for universities, vocational schools, and corporate training facilities. We respond flexibly to accommodate the imaging needs of the educational front and bring about innovation to the place of learning.

Major products: CLEVAS, SpiderRec

Sport Business

We provide a one-stop solution for the production and generation of sports content video and data, transmission and distribution, post-distribution archiving, and operational management of that content.

Major products:Technology development and provision related to sports tech

Photron Medical Imaging Inc. A leading company of medical imaging solutions

Medical information increases in line with medical advancement. From a vast amount of information, it is crucial to be able to utilize appropriate information accurately and efficiently. Photron M&E Solutions offers technology accumulated as the forerunner in the imaging field. With our "Kada-Solution," or the total system with a video network for cardiology at the core, we contribute a great deal to the usage of imaging information in the medical field. As a leading company, we will continue to pursue innovative technology and pursue further advancement.

Medical Imaging System Business

Photron offers a total solution to the cardiovascular medical field by developing movie network systems for medical images utilizing the latest movie image processing techniques. We offer our strong support to hospital's cardiovascular department. Product brand: Kada

i-Chips Technology Inc.

Expert of the image processing LSI taking the core of various video equipment

i-Chips Technology is a fabless manufacturer that develops, designs, and sells general-purpose LSIs centered on video and image processing (resolution conversion / IP conversion / image distortion correction, etc.).

In addition, i-Chips Technology is developing custom LSI contract development and IP licensing business. Products that incorporate the industry's most advanced technology by specializing in video and image processing LSIs include 4K systems, projectors, monitors, signage, multi-displays, OA equipment such as copiers, and FA equipment such as cameras and inspection machines. It is used in a wide range of fields such as.

LSI Development Business

LSI developed with our unique knowhow and technology are used in various display devices such as projectors and liquid crystal displays, OA devices such as copiers, and FA devices such as cameras and inspection machines.

Also, utilizing the unique knowhow and technology cultivated in the LSI development business, i-Chips is proceeding with DDR measurement work, consulting work, development of general-purpose module boards, etc.

DDR SDRAM JEDEC standard Contract measurement of physical layer compliance

Contract measurement range

Measurement of the standard defined by JEDEC for DDR / DDR2 / DDR3 memory on the customer's board

Contract superiority

DDR JEDEC standard measurements require an expensive oscilloscope. This service is a highly cost-effective service that comprehensively considers oscilloscope rental and measurement preparation and implementation.

Equipment to use

[Oscilloscope] DPO71304SX / DDRA [Probe] P7708

Various measurement conditions such as power supply, humidity, data status at the time of measurement, number of measurement points, etc. will be discussed and decided after a separate meeting.

IPmotion Inc.

IPmotion is an ICT partner suggesting the most suitable solution by high technology, abundant experience and knowledge

IP motion is a company name that expresses the desire to continue to be a company that constantly takes on challenges in the ICT industry, which changes drastically with the keyword IP, and to move the world with IP. In the changing environment of the ICT industry, we will continue to provide valuable services as an ICT partner who can sensitively grasp these movements and provide optimal solutions for our customers.

System Installation and Maintenance Business

IPmotion provides design, construction, maintenance and failure reception for WAN, LAN, Wi-Fi, server room, data center, telephone system, individual special equipment, etc. With abundant experience and knowledge in the ICT field, IPmotion proposes optimal solutions for our customers.

MVNO Business / Satellite Communication Business

IPmotion offers resale of mobile data services, cheap SIMs and Wi-Fi router rentals. IPmotion also provide location information services using satellite communication systems.

CONTACT

Photonic Lattice, Inc. A company focused on LIGHT

Photonic Lattice was founded to develop new photonic crystal products with the goal of expanding the functionalities of optical systems in a broad number of industries. Our core strength is in our process technology which enables formation of arbitrarily shaped micro-polarizers and micro-wave-plates onto inorganic substrates. Our materials have been confirmed to withstand high power laser light and therefore can be safely used in demanding environments. It is our hope that we expand our technologies into new application areas and build mutually beneficial relationships with our customers.

Manufacture and Sale of Photonic Crystal Chips

Using state-of-the-art photonic crystal technology, we provide polarizers and phase shift elements, tailored to our customer needs.

Manufacture and Sale of Equipment that Applies Photonic Crystals

| 2-D Birefringence Measurement System PA/WPA Series | It is a system that can measure birefringence and phase difference at high speed with a camera that utilizes an image sensor incorporating our photonic crystal and our own software. | | | | | |
|--|---|--|--|--|--|--|
| Near Infra-Red (NIR) 2D Birefringence Measurement System PA/WPA-NIR Series | Operating at 850nm wavelength, this system provides strong tools for process and quality control of pieces not transparent at visible wavelength such as special resins and chacolgenide, used for example in LIDAR and fact recognition systems. | | | | | |
| Thin film thickness/refractive index ellipsometric measurement | It is an ellipsometer that utilizes a polarization sensor incorporating our photonic crystal. The thickness / refractive index of the thin film can be measured at high speed and with high accuracy. | | | | | |
| Polarization Imaging Camera | It is a camera that uses an image sensor incorporating our photonic crystal. Polarized light information that cannot be seen with the naked eye can be observed in real time. | | | | | |

Official Web site: https://www.photonic-lattice.com/en/ Inquiry form: https://www.photonic-lattice.com/en/contact-us/

Advanced Research Group ("ARG") shoulders IMAGICA GROUP by innovative technology developments across the group companies

Advanced Research Group

Research Group

ARG of IMAGICA GROUP consist of research experts from the R&D teams in our group companies, and conducts various research and development projects in collaboration with universities in Japan as well as overseas. Our research themes include automatic coloring of animation, 3D pose estimation, naked eye stereoscopic vision and more, with a core of advanced AI technologies. We always try to lead the innovative technologies for the world.

Track records of joint research efforts in industry-university collaboration

Al automatic coloring for animation character

Faculty of Informatics.

We are conducting joint research with the goal of improving the efficiency of coloring work in anime production. We have developed a coloring system that can learn from even a small amount of data, and by simply coloring some of the uncolored videos (sets of line drawings), it is possible to automatically color the remaining line drawings. This makes it possible to handle coloring of works of various styles, characters, accessories, etc. compared to previous systems. In addition, this system is being tested in-house at OLM, and we are working to improve it based on feedback so that it will become a tool that truly helps artists.

This research will be presented at SIGGRAPH Asia 2021, SIGGRAPH 2023, and Computational Visual Media 2024

Al speech synthesis for weather forecaster "Virtual MORITA-San"

Computer Science Faculty of Science and Technology, Keio University

Using the voice of weather forecaster Masamitsu Morita as training data, Weather Map and OLM have developed a prototype voice synthesis system with high sound quality and minimal processing time using AI technology. In the future, we aim to apply this system to the automatic generation of regional weather forecasts using the distinctive voice of a weather forecaster and weather commentary using the voice of a voice actor.

Research on real-time 3D pose estimation in harsh lighting environments

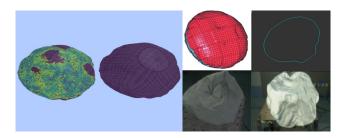

Faculty of Informatics,

University of Leeds,

PHYSICAL SCIENCES

FACULTY OF ENGINEERING AND

We are researching to realize a 3D posture estimation technology that can extract a performer's 3D posture stably and at a speed close to real time, even in an environment where various lights fly around and flash, such as a live stage. We will explore the possibility of new video production in the field of live entertainment.

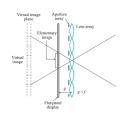

3D shape time change analysis technology

Photron

UNIVERSITY OF LEEDS

We are conducting research into point clouds and volumetric capture. We aim to provide feedback to product design by measuring and recording the time-dependent changes in 3D shapes of objects whose behavior and deformation are difficult to capture with normal cameras, and by analyzing the amount of deformation and comparing it with CAD/CAE.

Light field display Facial capture & real-time animation

Photron

Takaki Lab., Department of Biomedical Systems Engineering and Department of Electrical and Electronic Engineering, Graduate School of neering, Tokyo University of Agriculture and Technology

With a fresh approach, we have developed a new method for light field displays and jointly obtained two patents. We will continue to develop with a flexible approach, and by applying this technology, we aim to build an innovative world that goes beyond conventional means of communication.

× Photron × Wellington Te Herenga Waka

Computational Media

Application and development on combination of CG animation and geometric processing methods Developing advanced techniques for establishing efficient production pipeline, such as those for mesh decimation of highly complex models, and for facial and full body character animation.

Research on natural language processing in the field of weather forecasting Automatic generation of weather forecast contents for any specified local area based on weather data from all over Japan

Graduate School of Information Science and Technology

2.5D cartoon models with view-specific exaggerations (Best Paper Award at VC2020, CGVI Best Presentation Awards) (Best Short Presentation Award at Visual Computing + VC Communications 2021)

CONTACT

"IMAGICA GROUP is always seeking for great partners and collaborators to create future imaging technologies. If you would like to know more about our activities, please contact us at arg info@imagicagroup.co.jp."
